look over design and testing for context. Would it be possible to add a test that verifies a point will be generated if only one day is used?

5 glob · 4 read

Yes, it's definitely possible to add this test. Looking at the code:

**Current Implementation** (`chart_generator.py:11-13`):

```
# Use markers for single day data
marker = 'o' if len(data) == 1 else None
markersize = 8 if len(data) == 1 else None
```

The code already handles single-day data by showing markers/points instead of just lines, but this behavior isn't
